Orange Peel Grapple PA 320/6

HEMA orange peel grapple PA 320/6 is a specially designed grapple which distinguishes itself as it can be "wrapped" around the crane arm, which optimizes the use of the box.

PA 320/6 is sturdy and solid and designed for use in handling scrap and other demanding materials.

Despite its compactness, it is a grapple with good volume and large opening measurements.

The orange peel grapple is designed for a working pressure between 200 - 280 bar, making it applicable to almost all types of auto cranes.

All of the HEMA orange peel grapples are fitted as standard with powerful stops and lubrication on all moving parts.

There are replaceable bushings and bearings in all moving points.

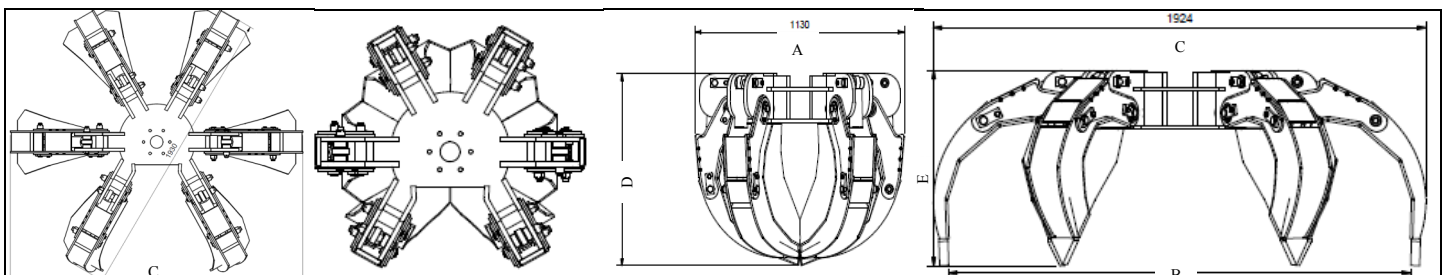

Poly Grapple PA 320/6
