

HEMA

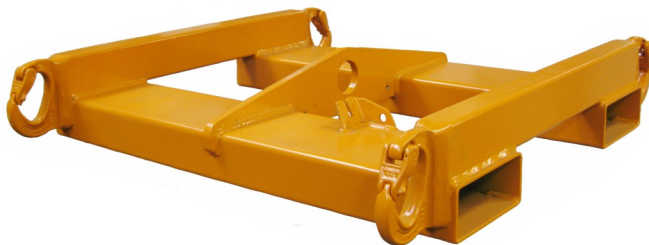

BIG BAG Lifting Yoke

HEMA Big Bag Lifting Yoke for forklifts or crane hooks is intended for handling Big-Bags with either a forklift or with a crane hook.

A special feature of the yoke is that the same yoke can be used both with the forklift and the crane when Big-Bags are handled in production and trans-shipments.

The Big Bag yoke is mounted with a safety device that prevents the yoke from slipping of the forks.

HEMA manufactures several custom-made lifting yokes to meet customer needs.

1,6 tons Big Bag Yoke for Truck or crane hook.
