

# HEMA

## Lifting Yoke for drilling pipes

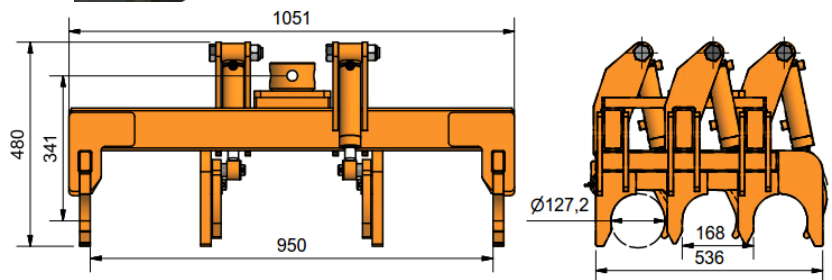

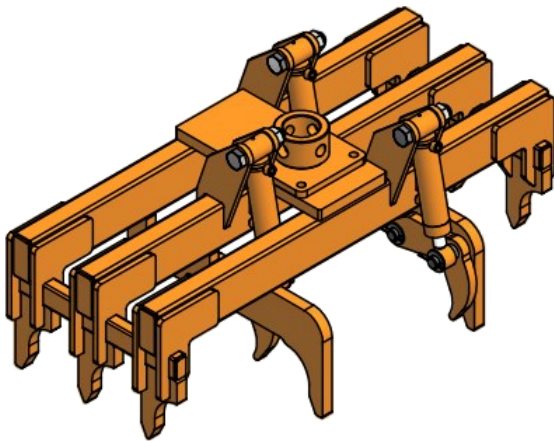

The HEMA Lifting Yoke is a tool that facilitates and streamlines the work with drilling pipes when these are loaded onto the machine and reloaded.

The Yoke is prepared for mounting by link or rotator with mounting flanges 140x140xØ17.

The HEMA Lifting Yoke for drilling pipes can be mounted on a crane with a rotator, making it easier and safer for a person to handle the drilling pipes without leaving the crane's operating unit.

The HEMA Lifting Yoke is designed to handle up to 3 pieces of drilling pipes Ø127/Ø168 but can be modified and delivered for other sizes and quantities.

## Lifting Yoke for drilling pipes 3xØ127/Ø165
